Action Contract — Team Approval

عقد الـ Action لموافقة الفريق

Owner: Mohamed Osama | Consumers: Habiba, Alaa, Mostafa

Source of truth: common/schemas/actions.py

ActionRequest

Field	Type	Notes
id	UUID	Unique action id
correlation_id	UUID	detect → decide → act
incident_id	string	Required
decision_id	string|null	Habiba Decision id
actor	string	agent | playbook:name | analyst
tool	string	See allowed tools
args	object	ip, ttl_minutes, user, ...
gate	G0-G3	Confidence / blast gate
dry_run	bool	Would-run only
idempotency_key	string|null	Execute once
proposed_at	datetime UTC	When proposed

Allowed tools

block_ip, unblock_ip, rate_limit_ip, tarpit_ip, lock_account, revoke_sessions, add_waf_rule, notify, update_case, verify_block

Gate TTL caps

Gate	Max TTL (min)	Summary
G0	0	notify / update_case / verify only
G1	15	+ rate_limit, tarpit, short block
G2	360	+ lock_account, WAF rule
G3	1440	Full write tool set

ActionResult & modes

Topic	Values
status	success | rejected | failed | dry_run | skipped
rejection_code	allowlisted, ttl_too_long, kill_switch, ...
autonomous	Writes after Policy Guard
shadow	dry_run — no connector write
paused	skipped / kill_switch — no write

Approval checklist

المطلوب الموافقة عليه

- [ ] Habiba — Decision → ActionRequest mapping OK
- [ ] Alaa — stream / correlation_id usage OK
- [ ] Mostafa — dashboard can display ActionResult later
